 "Is AIDS Man-Made? The theory that AIDS originated in the laboratory has been circulating in Europe, particularly in West Germany, since late 1986. The theory hinges on the claim that the AIDS virus (HIV) is virtually identical to two other viruses..."

 Excerpt: [V]iruses must undergo some type of genetic mutation in order to infect humans. [Researcher] Hahn and her colleagues discovered three chimp viruses with DNA sequences that are very close to HIV--so close that it probably required only a minor genetic change for them to make the jump from one species to another.

Regarding "AIDS Conspiracies" - Latest First

### AIDS Conspiracy

Maybe the virus was brought to earth by aliens who want to destroy mankind in a subtle way? I think earthlings are too stupid to manufacture a virus like AIDS.

## AIDS CONSPIRACY & OTHER RELEVANCIES

Personally, I believe that the HIV virus was intentionally created along with other viruses such as the Ebola virus to control our population. I also think, after giving it much careful thought and attention, after reading several weblinks regarding comtrails; that I have a weird hunch that comtrails, agent orange and the Gulf War Syndrome (GWS) are all related in one way or another. It is ironic that they basically have the same symptoms in common. And why would anyone want to "spray" our skies with something, unless they wanted to "rid" our population for some other unknown event that will take place in the future? Just a wild hunch. Something to let you think about.

### where's the epidemic?

I wonder where this promised epidemic of AIDS in the white or heterosexual population is? Oh,I know they are all doing safe sex. When will people realize that virus's do not discriminate. This so-called disease continues to be very specific in the people it targets. In spite of propaganda to the contrary it's target continues to be person speciifc. Hello, is anyone home? Think the worst people.

### Response to Mulder's comment

hey genius, antibodies aren't used to make vaccines. Vaccines work by exposing an individual to ciral proteins to let them make their own antibodies. sounds like you've seen the movie outbreak a few too many times... finding a host does NOT mean that you've found a cure, it's a hell of a lot more complicated than that which is why some of us make our careers out of being virologists instead of watching a hollywood movie and then touting ourselves around on the internet like we know what the hell we're talking about... got it? good.
