Confused and can't sleep-is it coincidence?

For the past 2-3 years I have been able to predict things. Like slowing down driving because I know a dog or deer will pop out in front of me. Or when I have a feeling in the back of my head that some one is going to die. And they did die all with in 3-4 months of when I get the feeling. That has happend to me twice now, and I don't know what to think. Is it coincidence? I need answers. I'm getting freaked out over all of this. Nows the time to talk to Sylvia Browne

Personal Experiences

I personally believe that some level of the mind is not bound by time and space. I have had pre-cognitive dreams all of my life and what I find fascinating is that they all involve me and my immediate future. For example I dreampt the sun exploded and then two days later a report on the news said that a massive solar flare had hit the earth. These "coincidences" always amaze me.
