The following document is taken verbatim from the United States Air Forces Academy textbook, " Introductory Space Science, Volume II, Department of Physics, USAF. " This is the volume that was being used by the Air Force Academy, at Colorado Springs, Colorado. The Air Force Academy has since pulled this volume from the curriculum in the very early 70's, because of the controversy it generated, but after reading this, I think you will find that the United States Air Force has considered the subject of UFOlogy to be very "serious business."

A DOE spokesman says: "The picture was taken at the Nevada Test Site (AREA 25) at the beginning of the project to test the drilling system to create the underground systems that would house the MX missile."
