This is not a commercial ad. I make nothing from this and neither does Dr. Michael Wolf. All profits go to the Daniel Wolf Memorial Foundation for Children.

I am sending this because this book reveals truths that need to be known by the citizens of the world. As Paola Harris, Italian Journalist wrote in her review of the book, "One must read between the lines and one understands the phrase 'official deniability' and realize why it was created."

This book is now on sale at Barnes Noble and it would be a good time to purchase it. Special sale price and address is at end of this. In my opinion, if you will only read one book this year, this is the book to read. I am going to post a postscript from a letter I received from Dr. Wolf that I feel tells more in one paragraph about the book than I could in pages.

"P.S. I wrote the book FOR THE WORLD, and for the FUTURE viability of the young who are the hope and the future. I wrote the book for the people, not writing "down" to them, but as a gift....my heart breaks when I see so much evil in the world, the retreat from the light. THIS MUST CHANGE, and people like you are the ones to do it. Thank you again. - Michael"

This is a portion of a book review by Michael's dear friend, and mine, Paola Harris, an Italian Journalist.

"After having read THE CATCHERS OF HEAVEN by Dr. Michael Wolf twice, and after having done numerous interviews with top UFO military informants, I realize that this man is telling the truth about his involvement in the UFO Cover-up. Billed as fiction, the book reveals the intricate workings of a group called the Alphas team (first contact) and how they were used to interface

with several alien visitors. One must read between the lines and one understand the phrase 'official deniability' and realize why it was created.

"It is obvious that there is some wise element in the U.S. government that wants the 'truth' to be revealed in this intimate story of the life of Dr. Wolf otherwise it could never have been published. Yes, one is challenged intellectually by this book. It appears as a story, quasi Faulkner-like in its literary style, filled with the stream of consciousness accounts and colorful poetic images, sometimes too abstract for the average reader.

"What would you expect from a genius who has many PHDs, a scientist, a philosopher, a painter and an extremely sensitive man who first received a literary award at the age of seven years old. Michael tells his story and sometimes rants and raves and at first, the reader may become discouraged in reading but those who are able to assimilate the information given will be truly rewarded in the end with a veritable mind expanding experience.

"The book talks about Dr. Wolf's cloning of a soldier called GI Joe as part of the government's Black Operations program called Project Sentinel. It talks about Michael's childhood and adult experiences of contact with several races of 'galactic Visitors' and how he was used by the US government as an 'interface' or Intergalactic Ambassador worldwide; how he was sent to Vietnam as Flight surgeon and called back by LBJ because he was too precious and was needed; how he worked at area 51 (S4) on genetic research, cloning and neurotoxins (the King Cobra has 144 different ones); how he did undercover work for 'the Company' (CIA) and lived in Rome; how he was used as an extra in the Fellini film 8 1/2; how he needed to hide his activities from his wife Sara and his son Daniel; how devastated he was when he survived a 'suspect' car accident that killed his wife, 17 year old son and unborn child. He has reason to rant and rave as he is like to Walt Whitman screaming in pain for lost innocence and serious regret for a life that he truly believed was 'a contribution to science and humanity. It is obvious that he has some regrets but it is also obvious in the last chapter that he believes that humanity's saving grace is the ability to grasp the truth and unite together in an atmosphere of unconventional, unconditional love. I was truly moved by this book and I recommend it to all serious researchers who hope to find the truth in our lifetime. - Paola Harris"

Everyone,

I second Patti's and Paola's endorsements. This is a major book, and a rare chance to peak inside the mind and consciousness of one of the most highly-placed individuals in the government group managing UFO/ET matters.

A must read for anyone even slightly interested in UFOs/ETs.

Richard
