"General Ramey, commander of the Eighth Air Force, which included the units at Roswell, posed with the famous UFO crash debris in July of 1947. Identical symbols in this photo and the previous one, featuring Major Jesse Marcel, Sr., refute the claim that one man posed with a Rawin weather device and the other posed with the real wreckage. The debris is the same in both pictures. This fact is attested to by James Bond Johnson, photographer of these famous photos."

[Roswell Debris Symbols Match Those in Santilli Film](#)

The Roswell Photo Interpretation Team (RPIT) web page on the photo enhancements/enlargements of the Roswell debris is very revealing. The symbols there match the I-beam glyphs in the Santilli autopsy film. It would be interesting to know what the connection is between these 2 photos. Did James Bond Johnson also take the photo shown in the Santilli film? Please see our research on these symbols done in March of 1996. <http://members.aol.com/ufoseek/> (click "Roswell" on the menu)
