 "Abstract - In July 1995 the CIA declassified, and approved for release, documents revealing its sponsorship in the 1970s of a program at Stanford Research Institute in Menlo Park, CA, to determine whether such phenomena as remote viewing "might have any utility for intelligence collection". Thus began disclosure to the public of a two-decade-plus involvement of the intelligence community in the investigation of so-called parapsychological or psi phenomena. Presented here by the program's Founder and first Director (1972 - 1985) is the early history of the program, including discussion of some of the first, now declassified, results that drove early interest."

## Reader Comments

Regarding "Hal Puthoff" - Latest First

### **Puthoff and superconductivity / David Hudson**

What is completely missing here, is that a man named "David Hudson" claimed to have worked together with Mr. Puthoff for a while. You see, Mr. Hudson claimed to have detected precious metals in a high-spin state, which exhibit superconductivity, and other highly interesting features. Mr. Hudson claims that these elements in the high-spin state were known as "Philosophers Stone". You might want to check <http://www.zz.com> or <http://monatomic.earth.com> etc. Search for "ORMES" or "David Hudson".
