Regarding "Jack Shulman" - Latest First

### [Jack Sarfatti responds to Shulman](#)

Schulman is a vicious crank that no serious person in the field pays any attention to. He is a computer salesman. That is all he is. He is using UFOs as a sales gimmick to try to sell computers online. I do not take his claims about alien technology seriously. His understanding of my relation to Erhard is all wrong. For the true story go to...

### **What Visitors to ACC Message Board can Expect.**

Hello, I was recently banned from ACC Mesage board, not because I was rude or offensive but because I disagreed with some of the statements made by Mr. Schulman. I was labeled a "Disinformationist who was secretly working for the government" and was banned after only three posts!!! I am posting this message to let others out there know what to expect from the paranoid web site of ACC.

### **Technical comments**

I'm working in a chip manufacturing company, and have among others, a good know-how in electronic design. After quickly reading through the technical details of the tcl logic, it appears to me to be very suspect. All the pictures look "borrowed". For instance, using the picture of a slotted pentium to put an ACC logo with a drawing software seems odd for its prototype TCL. Showing a standard wafer doesn't fit the description of a unified field for data storage, etc.. Now even strange, pretending an XOR gate as the simplest gate is plain wrong: an XOR gate in its simplest configuration is made of 4 NAND gates... Bye bye TCL logic.

### [Another Shulman Lie?](#)

On the referenced web page, Jack Shulman talks about the recent appointment of Dr. Paul Prueitt of Highland Technologies as "Joint Director" and "Science Coordinator" for ACSA's "Semiotics Laboratory." I contacted Dr. Prueitt via e-mail. He told me that he has "no current relationship with Jack Shulman" and that he felt "uncomfortable with his claiming that I am part of his Board." There is a pattern here that appears to permeate every aspect of Shulman's life.
