MEXICO CITY, December 26 (Itar-Tass) - The Costa Rican mass media reported on Thursday that unidentified flying objects were spotted the day before in the country's air space over Golfito district, which is 330 kilometres to the south of San Jose. However, TV cameramen were unable to film them as they did on Monday.

On December 22 cameramen from two local television channels filmed at least a dozen "flying saucers" in the sky south of the Costa Rican capital. Before the eyes of hundreds of people, they made zigzag maneuvers for several minutes. Flight controllers of the International Juan Santamaria Airport counted "approximately fifty thousand traces" of their movements. Some car drivers stopped to watch the phenomenon.
