Reader Comments

Regarding "The Pleiades" - Latest First

According to astronomical data, the Pleiades are a group of 50 very young stars (less than a billion years old). The only way there could be a civilization there is if they arrived there from somewhere else, and found and terraformed some promising young planet. The brightest star of the group, Alcyone, is 1000 times brighter than the Sun. If their planet orbits this star, I hope they've got good sunglasses and lots of tanning lotion!

-- Keith (ncc74656@airmail.net) 9/20/98 (#2)

mother ship saturn

Could you tell me if they (the pleiadeans) have a huge space station at the north pole of Saturn as I have read somewhere that this is the case, possibly for the purpose of evacuation of people from the Earth to safety. NASA HAVE PHOTOGRAPHS OF THIS CRAFT AND ARE NOT RELEASING THEM! As usual they are playing us for fools. Please reply, as I am curious to know-I have been visited by them! ANUBIS.

-- ANUBIS 12/2/97 (#1)
