Subject: UFO SIGHTINGS.

FOR GENERAL USE OF UFOMIND.

When I was twelve years old, in 1952, I was playing on the monkey bars of the playground in Arlington Heights housing project in Pittsburgh, PA.

It was dusk on a clear cloudless evening and there was not a cloud in the sky. Suddenly from the North Eastern sky at an approximate altitude of 50 k feet appeared an elliptical glowing disk. Its color was a glowing yellowish red.

It traveled across the sky in a Southwesterly direction on a flat trajectory at an incredible speed no aircraft could match, then or now. It crossed the horizon in ten seconds flat. No one else was close enough to discuss it with, and I never talked about it for years. Being a natural sceptic, I thought I was seeing things.

Last year, I mentioned the event to my younger brother, (He's 54). I was dumbfounded when he disclosed to me that he had been on the playground that night and had seen it too. He described to me the occurrence and his description was identical to mine.

You may publish this account if you feel that it has any merit or credibility. It is my only encounter of the first kind. I want to believe.

Sincerely,

C.N. Kratsas
