"There is indeed a mystery out in Marfa, but it has nothing to do with foo-fighters or swamp gas. The mystery is discovering how gullible human beings can be. And I will remain a skeptic of the Lights until someone can present valid, scientific proof that these lights are anything more than car headlights."

Regarding "Marfa Lights" - Latest First

Searching for the truth

I grew up in the Marfa area and have observed the lights many times. I have been to the area with telescopes, radio spectrum analyzers and optical spectroscopy equipment. I saw no radio activity that correlated to the lights activity. I am going to place a remote observation camera in the area this year, for spectroscopic study. Several things to note about the area, mainly the fault lines and seismic activity, the extinct volcanic vents, and the enormous amount of thermal inversion across the area. Lets keep an open mind, as every theory I have had so far has hit a zero. The truth is out there, and I will continue to search for the facts.

-- Zeke Dawdy (sdm8000@efdata.com) 2/4/99 (#2)

Lets get serious

What I know of the marfa lights is very little, only what I saw on T.V., But I would like to know why fifty volunteers or so dont go and camp out a few miles aprt from each other using a good telescope and some photographic equipment surely someone would get the proof needed to prove this mystery either way. If these lights are being mistaken for car headlights then they cant be that far away, strategically placing a good amount of people directly at the most common areas would work, if this has not been done yet it should be. we live in a world of lies and deceit,lets start getting to the truth. It's out there...

-- John Schwarz (jschwarz02@snet.net) 12/15/98 (#1)
