

# Search This Server

Our server can be searched through the following options. Each of these searching systems has its strengths and weaknesses, but one of them is likely to lead you where you want to go. All three of our domains are included in these searches: [www.ufomind.com](http://www.ufomind.com), [www.psispy.com](http://www.psispy.com) and [www.vegasindex.com](http://www.vegasindex.com).

## Full Server Search Via Altavista

---

### Search Our Site:

To search our site only, do not delete "host:ufomind.com" - just add your own search words to it with a space between each. This search looks at document text, not just titles. Altavista indexes a large portion of our site, but not all of it and recent items may be missing.

### Search Our Site:

This search of our alternate server name might yield a few more items.

## Search for Links to Other Servers

---

### Enter server name or URL:

This option searches all the links on our site for those that point to a given server. You can either enter the server name (e.g. "www.sampleserver.com") or a full URL from which the server name will be extracted (e.g. "http://www.sampleserver.com/anypage.html"). This index is updated nightly.

To search for all links to servers in a specific country (except US), type in the two-letter country code or consult [this list](#).

## Search the Web

---

### Enter search terms:

This option creates a "meta search" page with links to various search engines and on-line information sources.

---

**The search methods below are currently under construction**

## Email Username Search

---

### Enter email username:

This option lets you search our entire site for documents containing a certain email address. Enter only the "username" portion of the email address (the part that comes before the "@"). Capitalization is not important, but otherwise the username must match exactly. This index is updated nightly.

---

## Keyword Search of Titles

---

### Enter one or more words:

This option searches the titles of all of the documents on our server for the keywords you enter. A document is returned only if all keywords are matched in its title. Each keyword entered must be at least 4 characters long, without any digits or punctuation. Capitalization and word order is not important, but spelling of each word must be exact. This search does not include include document text. This index is updated nightly.
