

# Review

"Hesemann is a huckster and narcissist, known for throwing temper tantrums when he doesn't get his way. He is widely despised by the more scientific ufologists in Europe for his tabloid methods and blanket endorsement of questionable UFO cases. His magazine is personal soapbox with which he attacks anyone who challenges him. He remains a powerful force in Europe, and is often quoted by the press as representing ufology there. Said one member of MUFON CES: 'We are stuck in the middle, with skeptics on one side and the people like Hesemann on the other who drag down our reputation with him.'" --*Glenn Campbell*
