Subject: Odyssey Web Site Available

The Odyssey Fringe Science Research Network now offers a Web site.

What does that mean?
--------------------

    It means that you can now access the complete Odyssey file
collection using a World Wide Web browser (Netscape preferred).

    Note: The Odyssey File Request Processor and FTP site are
still available.

How does it work?
-----------------

    Tell your Web browser to find IP Address 24.3.12.10 like this:

                <http://24.3.12.10/>

    Or, give this URL to your Web Browser:

                <http://CC636243-A.twsn1.md.home.com/>

    If all goes well, and if you had previously established an
Internet connection before trying to access the Odyssey Web Site,
then you will see the Odyssey Fringe Science Research Network
start page.

What do I do then?
------------------

    Bookmark the Web page!  Then, you can optionally click on the
Guestbook animated icon to sign in, or you can click on the Start
Odyssey icon to enter the Web Site.

So, what do I do then?
----------------------

    Whatever you want.  Here are some of the special features:

        - Nearly 7,000 files available for immediate download.

        - Separate multimedia libraries for movies, photographs and
          audio content.

        - Over 1,000 UFO and related photographs organized
         geographically and by topic available for immediate
          online viewing.

        - An online keyword searchable database of all the Web Site
```

```
            files and their descriptions.

        - Over 20 categories of non-multimedia files.  Each file
          category provides a complete online keyword searchable
          database of the total file content.

        - A Special Features section devoted to an expanded treatment
          of specific topics.

Frequently Asked Questions:
---------------------------

    How do I view the photographs?  The Odyssey Web Site uses an
    internal FTP connection to send the selected image to your browser.
    If you have automatic-save-to-file disabled then the image will be
    displayed when you click on the image's filename.  (Alternatively,
    movies will be presented and/or audio files will be played.)

    How long can I stay online with the Odyssey Web Site?  As long as
    you want.  There are no time or usage limits.

    How long will it take to display a photograph?  The Odyssey Web
    Site operates a full-time direct 500Kbps connection to the
    Internet, so it won't take long if you've got a fast modem.

    Okay, enough questions, is this available now?  Right now.

Thanks, take care.
John.
