Miitary helicopter pursued in Pouso Alegre, Minas Gerais state, BRAZIL

By: Alexandre Minoru Ito geoni@aquaserv.aquarius.com.br

In the last year our research team was notified about a very interesting case involving an Military helicopter model Panter. It belongs to I ComAvEx (primeira Companhia de Avia=E7=E3o do Ex=E9rcito - "1st. Flight=Company of Brazilian Army), placed in Taubat=E9. The witness is a cameraman, and he authorized the publication of this case only now; that's why we are showing now to the public. In that helicopter was a mecanic-sargent, a captain (the pilot), the cameraman and some soldiers (all the names are ommited for safety reasons).

In may, 1995, this helicopter was in training mission in the region of Pouso Alegre city, in the south of Minas Gerais state, Brazil (this city is close to Varginha...). At 11:30 p.m., approximately, an Unnidentified Flying Object (UFO), long egg-shaped, very brilliant and with some coloured spots on the tips and sizes. It was in the front of the aircraft, which was at 300 ft. of altittude, and it started to illuminate the aircraft with its spots. All the scene was recorded by the cameraman into the helicopter.

The pilot got instructions to change his route, and that's what he did; but the UFO returned to the front of the military aircraft, in collision route. The pilot change his route again, and they was pursued by the UFO for approximately five minutes.

All the military in the helicopter was very nervous, and then the UFO disappeared just in the front of everybody. The VHS videotape was requested by the pilot, and he put it into his pilot suite, and when they returned, he carried out with it. Nobody knows where is this tape at this moment. But a picture of the helicopter is attached here, and also a picture of the cameraman (of course, his face is smudged).

That's obvious: the militaries are very worried about the UFO question. What kind of object was that, which pursued a Military helicopter (it was unarmed), "played" with it and flew away? Nobody in the I ComAvEx wants to discuss the case: nobody "knows nothing". But, if it really was not an UFO, why was the videotape taken?

Dan: This is a case researched by the GEONI team. The witness (the cameraman) is reliable, serious and doesn't have any problems with his family. The only thing that I can tell is his initials: Jos=E9 A.

I'm translating more cases that happened in our region. Soon, we will send you more cases.

Thanks
Alexandre
