Shades of, "The Hundredth Monkey"! <G>

>Dale Retter may have invented this in a perfectly normal way,
>but we would be remiss as researchers if we didn't look into it
>now that we know about it.

Agreed, I was only empathizing with the poor bastard because he probably
knows nothing about UFO's or the sting of the inquiry
that is highballin' it his way. <G>

>Having been in the UFO hotseat, I do not envy him what is coming his >way!!!!

I too am a brother of, "The Order of the Charred Tusch." I was only trying
to give Retter his dues, which is the benefit of the doubt.

I agree Bob that this [is] an important lead, and should be followed up. I
just didn't think it was fair to "assume" a _direct_ connection between
Retter's Datahand and the Santilli wreckage. The thread was taking on that
tone so I threw in my tuppence [before] the hounds were loosed! Retter's
about to find out what it feels like to be wearing Milkbone underwear in a
dog eat dog world! <G>

Good luck in your hunt. Please keep us all posted as to progress if you
will. And all "good" Catholics should say a Novina for the passing of Mr

```
Retters age of innocence. Until now, he probably thought that the [Cosmos]
was the pinnultimate of cold and unforgiving places.

Welcome to,"THE WEB" Mr Retter! <insert science fiction theramin wail here:
oooeeeeahhooo! >

John Velez ;-)
