 Subject: Video of 'Object' in Moon Orbit

Hello up there!

Just thought I'd pass this on. It's from Francis Ridge, former MUFON State Director, longtime UFO investigator, and now Project Coordinator for Project Lunascan.

Jerry Washington
 (SD KENTUCKY/MUFON)

STRANGE OBJECT NEAR THE MOON?

TLP: VTD1996

The Lunascan Project began live & taped, high-powered, high-resolution video imagery of the lunar surface in September of 1995. On September 21, 1996, a little over a year into the project, personnel tracked an object that appears to be in orbit around the Moon. This first documentary video produced by the project had to be re-filmed because of this early discovery. The documentary is approximately one hour long and is narrated by the Project Coordinator, Francis L. Ridge. The video shows the massive scope and multiple CCD camera array on Scope Transport Unit, Control Room, and routine of searching for Lunar Transient Phenomena. \$20.00 includes shipping.
