UFO UpDates Mailing List

Boylan bulletins

From: **Brian Cuthbertson** <brianc@fc.net>
Date: Sat, 25 Jan 1997 16:26:50 -0600
Fwd Date: Sun, 26 Jan 1997 11:37:25 -0500
Subject: Boylan bulletins

Dr. Shargell,

Back on Wed Dec 11 Dr. Richard Boylan posted some "bulletins" to the UFO updates email list, to which I subscribe, and which I have attached below. Now that the Jan 23rd date referenced in bulletin item 2 (below) has passed without event, I wonder if you, as the cited originator of the information, might have any further comment on these predictions for the subscribers to the UFO Updates list?

You are welcome to respond directly to the UFO Updates list manager at updates@globalserve.net, or to me personally, in which case I will forward your response to the list myself.

Thanks much,
-Brian Cuthbertson

News Bulletins

1. I received a call yesterday from the White House Office of Science and Technology Policy (OSTP) that this Wednesday, December 11 in Washington, DC, the Space Summit will take place which President Clinton called for during his comments on NASA's announcement of life on Mars. In attendance will be key Congressional leaders, top NASA officials, high Pentagon officers, and select members of the

Administration. A very few select scientists will be making presentations in keeping with the Summit's agenda of what America's objectives for space should be, now that we know for certain that extraterrestrial life exists. Among the scientists presenting will be Dr. Steven Dick, expert on extraterrestrial life and cosmology. OSTP's Jason Kim invited me to submit to them written information pertaining to my expertise in extraterrestrial life.

2. Former NASA scientist Lee Shargell, Ph.D. today confirmed to me by phone that radio signals have been received from Comet Hale-Bopp's "companion" object, but that they have ceased transmitting for the time being. Dr. Shargell also stated that there will be a number of scientists present as observers at the International UFO Congress at Laughlin, Nevada January 18-24. He additionally reported information from a reliable source in Australia, (probably at the Pine Gap installation), that on January 23rd a brilliant show will occur in the cosmos involving a bluish-white star not too distant from Earth. Shargell's informant also stated that signals from Hale-Bopp's "companion" will resume in the high megahertz band (K-A or K-U, he thought), and be received on Earth, possibly affecting radio or television transmissions. Shargell also noted that he has in possession copies of photos from lunar surveyor satellite Clementine showing anomalous objects (not ice) in a lunar crater and also near the Moon in space. {Dr. Shargell's E address is: Galcticon@prodigy.com}

3. Multiple extraterrestrial sources, mediated through human interlocutors, indicate that the first of the official interstellar federation Landings will occur before Winter is over. There will be additional Landings in 1997, at least one of which will be videotaped by television crews and shown on television.

Richard Boylan, Ph.D.
