Subject: Assassination Executive Order

A while ago in the course of one of my mailings, I mentioned the current on-going study into the possibilities of highly classified Executive Orders. This, I stated based on my findings then with regards to the involvement of an individual in some of the United States' most covert, and classified operations.

Consequently, as follow up, we received a number of documents from the individual concerned, which in close examination of existing documents in my own archives signed by the same President, on the following count tend to be authentic. Although, more follow up forensic examinations are required to prove their actual authenticity. Due to the nature and the gravity of their contents, I produce a copy of one of them. That, if proven authentic would have far reaching political ramifications;

The letter is a written on a White House stationery, with White House type face. It is not dated for legal reasons of its contents, based on the NSC regulations, directives and instructions governing Presidential Findings. Equally, since the letter is signed by the President himself, is considered to be an Executive Order - mainly due to orders actually issued in the letter to the recipient.

THE WHITE HOUSE

Washington

D.G. Chip Tatum
Codename: Pegasus

You are hereby ordered into service of the United States Government.

It has been determined that [excised], has illegally obtained documents which are of vital concern to the security of the United States and selected allies of the United States. It has therefore been determined by Findings of the National Security Council, that these documents must be recovered.

Due to this determination, you are authorized to use whatever means necessary to recover said documents and ensure that this criminal is brought to justice. You are authorized to exceed existing regulations and FTM's to accomplish this mission.

If loss of life occurs as a result of the performance of your duties, you shall be exempt and protected from prosecution.

Signed: George Bush

In close examination of the document, with other documents signed by Bush, in my archives, the following similarities, at this stage are clear;

1. The type face is identical.
2. Bush often had large signatures.
3. He often used not fountain pen, but pens like marker pens to sign his letters.
4. The gaps between paragraphs were always kept to minimum.
5. There were no margins at the beginning of each new paragraph.
6. His official letters were, almost always short.
7. The type of vocabulary [words] used is similar, so is the grammar.

As stated before, further detailed examinations are required to determine further the authenticity of these documents which are sixteen in numbers, and all bear official Presidential seal of office.
