Komarek on Pflock vs. Corso

Subject: Komarek on Pflock vs. Corso

I exposed debunker Karl Pflock around 2 years ago when he was working with the Fund For UFO Research in a attempt to gain credibility. This to pass himself off as a legitimate UFO Researcher. Of course FUFOR even went so far as to give Pflock support and publish his Mogul material.

I got all kinds of grief from the UFO establishment for fingering Karl as a debunker and bringing up his CIA and DOD background. I also brought out on the internet the allegations in a book back in the seventies that he was passing off disinformation on cattle mutilations at that time.

In usual debunker tradition Karl even threated to sue me in a even more direct way than debunker Kal Korff to make me back off. It won't be long before the debunkers and other intelligence operatives within and without of the UFO community really begin following Pflock's lead to distroy Corso's credibility and character.

The best, Ed Komarek (ORTK)

Here we go again!
From the May 20 Issue of Saucer Smear

KARL PFLOCK, co-author of the forthcoming book "Shockingly Close to the Truth!", writes as follows:

"John Alexander's letter (in the April 20th `Smear') re Lt. Colonel Phillip Corso is interesting both for what it does and does not say: Taking the latter first, in a March 24th telephone conversation, John told me he not only had checked out Corso's military career but had extensively researched the histories of earthly technologies (e.g., transistors, computer chips, lasers) which Corso claims are the spawn of alien artifacts recovered from (which?) one of the many alleged Roswell 'crash' sites and provided to American industry by himself and his conveniently late boss General Arthur Trudeau, beginning circa 1961.

"John told me his investigations confirmed what he (and I) thought to be true: (1) The historical record of these technologies is clear, complete, and unambiguous, establishing without a doubt that they are products of good ol' homo sap skull sweat, with no help of any sort from alien know-how; and (2) Some were developed before Corso claimed he and Trudeau gave American industry a jump start with alien goodies. Why John didn't include this information in his letter, along with his 'character reference' for Corso, only he can tell us.

"As for Corso's alleged heroic exposure of sordid and secret Cold War activities concerning POWs and decades of U.S.

incursions into Soviet airspace with significant losses of aircraft and aircrews - baloney! Most of what Corso had to say to Congress was old news, and much of the rest was highly questionable. And Project Horizon, the Army's moon-base plan? Anyone who has paid any serious attention to U.S. space programs since the 50s has known about it for decades. I think I first heard of it from the late science-fiction great Robert Heinlein in the mid-60s, and somewhere in a box in my garage, I have a fairly lengthy, unclassified summary of the Army plan.

"And as for Corso being a 'fine gentleman' and 'no bulshit artist', well, I guess we all have our own standards. In January 1993, my wife and I had the 'pleasure' of spending several hours with the good colonel in and around Roswell, and, as I noted in an earlier missive in 'Smear', at best he's Frank Kaufmann with credentials!

"A final thought: If Corso was such a big deal, why is it he retired from the Army as a dime-a-dozen lieutenant Colonel after only 20 years of service?"
