Subject: Object over Bangor North Wales UK

Just received this report from UK  
Joe Henry  
Minnesota MUFON

On Sunday November 16th at 16:10 hrs GMT an object was sighted moving South to North over Bangor North Wales, UK. The object was observed from the upper floor of the University Library. When the object was first sighted it was bright white in colour, then it entered a cloud, when it emerged it was a Yellow/Gold in colour, and had a similarity to the rescue helicopterts which operate in the area. But the object showed not characteristic rotor blades or floation/undercarraige struts port and stardboard. It had no flashing warning strobes and no ensignia denoting its origin.

The shape was similar to a tear drop on its side. The motion seemed to be too smooth to be a helicopter or other aircraft. It did not reappear once out of sight. The object was at approximatley 500ft with the sun to its starboard. The forward portion of the "fuselage" had a black/dark area which led me to compaire it to the Sea King helicopter in the Search and Rescue colours. There was no forward canopy visible. The craft was in sight for approximatley 8-10 seconds. I am an experienced ex-military aircraft observer and am proficient in aircraft recognition. Hope this is of some interest to you. Thanks for your time.  
S.
