NAZI SAUCER!

Milton Keynes, England, it's not the kind of place where we expect to get new information on real life flying saucers. But after our recent report on a shaped aircraft in Canada, top secret American saucer projects and Germany's development of craft like this during World War II, a SIGHTINGS Researcher received A letter from viewer D. Robin Stowell.

A typesetter by trade, Stowell alerted us to the book, Brighter Than A Thousand Suns. An authoritative history of the race to build the first Atomic Bomb. Stowell typeset the original manuscript nearly forty years ago. And never forgot this brief reference to a Nazi Saucer that could out-maneuver any allied aircraft.

Four decades after publication, Stowell found a copy of the out of print reference book and confirmed what he had long remembered. The footnote describes German Saucers that were forty five yards across, capable of reaching speeds over Mach One and climbing to an elevation of nearly eight miles. Some experts believe that these Nazi Saucers could have been responsible for the legendary Foo Fighter sightings over Europe late in World War II. But if they were, it still does not explain Foo Fighters spotted over the Pacific during the same period.
