Hi Errol, hi All,

In my original sighting report I wrote,

>I fired of some photos but I don't expect much from them, the objects were
>>just too far up to be seen naked eye.

Well, I was wrong. I got them on film! Thank you Pentax for making such fine cameras and lenses. <G> Here are the first two scans. I have a total of eight photos, a sequence of four involving one sighting and a series of four taken an hour or so later of the same or a similar object.

The first two pictures I'm posting are the original photos with enlargements and enhancements as 'insets' within the original.

The third picture is a 'composite' of picture one and two that shows the change in position of the UFO from one photo to the next. I hope Bob Shell is taking a bit of time to peruse these pictures that I've been posting. It's all daylight stuff. Again, these are not to be reproduced or reposted elsewhere without my express permission.

I saw UFOs and I got the pictures to prove it! <VBG>

Enjoy,

John Velez
