>>As noted, there is a fairly good paper trail that follows the
>>development (or at least the alleged development) of >semi-conductor
>technology in the world. But the source recently >quoted indicated
>that a significant date in the transistor's history >was late in 1947,
>and this could have nothing to do with the >alleged actions of Corso in
>1960-61 while assigned to the >Pentagon.

>Corso writes that "the initial introduction of the integrated-circuit
>chips from the Roswell crash had reached defense contractors as early
>as 1947 in the weeks after the material reached Wright Field." But to
>put his remark in perspective I'll give you the whole passage ("The Day
>After Roswell" p. 177f):

I have a source, which I cannot reveal at this time, which told me
that the integrated-circuit technology was developed not from the
Roswell Crash in 1947, but from a crash in 1942. That is all I
can tell you at this time.
I leave it up to the sleuths to check out this lead. Or, you can
just trash it and continue argueing among yourselves about Roswell.

REgards, Mike
