Subject: "UFO SPHERE/ORB" over BROOKLYN

Hello Updates.

Last night I received, from Skywatch International, a long
account of a "sighting" over Brooklyn, and was interested to note
that the "witness" had attempted some form of mental
communication with the object in question.

Has anyone else ever found that, when watching "unknowns," it is
possible to establish some form of telepathic rapport?

The text of the posting follows here.   There were also TWO
photographs of the object in question.

"UFO SPHERE / ORB"

This picture shows a " UFO Sphere / Orb" which was filmed over
Brooklyn, New York by ALEX CAVALLARI. The UFO sphere / orb was
seen maneuvering in what appeared to be a controlled and or
piloted fashion.

It was a nice day and I had to go outside on the roof of my home
to adjust my amateur radio antenna because some high winds had
shifted its position. When I was finished I was looking around
skywatching for a few minutes before going inside. It was clear
with some white clouds, the sun was low and bright.

I first noticed a small orange / red colored bright dot in the
eastern sky, in the direction of Kennedy Airport. At first I
thought there was some dirt on my glasses, so I cleaned them and
looked back at the sky, there was no colored dot to be found
anywhere. I scanned the sky for a few more seconds and all of a
sudden the UFO appeared , it just appeared from nowhere, I did
not see it fly to the area in the sky which I viewed it in. This
time it was much bigger and closer, it was about the size or
diameter of a cigarette (1/4 in. diam.), when viewed at arms
length. I went inside and got my camera, it took me about one
minute to get the camera. When I returned and looked for the
sphere it just appeared to swoop straight down in front of my
view and then it stopped for about 3 seconds and then it
disappeared. When it was at its closest point to me it was bigger
then the moon. I held the camera up and started to look through
the camera to scan the sky so if I saw the UFO again I would be
ready for it. The camera is set to automatic when it is first
turned on and I had the zoom set to 12x maximum zoom. About 3 - 4
minutes went by and I was getting tired of looking through the
camera so I decided to have a cigarette and wait and look around
the sky for awhile. About 5 - 6 minutes goes by and I hear a loud
rushing noise in my ear, only my left ear, it sounded like the
rush of the ocean or electrical "static" noise, the noise was
perceived as fairly loud and it lasted about 10 seconds. The
noise was fading out slowly when I started to think to myself =85..
"you do this all the time=85.you fly around take pictures of us and
never let us take pictures of you =85I know your there =85.come on,
that not fair, I know you hear me...." and all of a sudden I turn
around and I see the UFO hi in the sky and to the north, it is a
small colored dot again, I aim the camera and it is gone, I turn
to the left , west, and it is right in front of me I take 1
picture, the UFO started to move forward and down towards me and
then stopped , it was the size of a basketball when viewed at
arms length, a bright red, orange, yellow, white orb. It appeared
to be a solid mass of light, there were different layers of color
around the perimeter of the sphere. It then went to the right,
north, then went straight up and straight back down, I was able
to have the camera on it during this time and I took 2 pictures.
Then it just flew from the right, north, stopped for a split
second and headed to the south west and it appeared as if it flew
into the sun and was no longer visible. The total time of the
event was about 12 minutes.

The flight pattern and the ability of this craft to appear and
disappear make it appear to Alex that this must have been a craft
which had intelligence controlling it. Is it coincidence that
when Alex mentally though for the UFO to come back that it did or
was it a form of mental electrical communications?
