Hello Bob and other list members.

In my posting I did NOT include the photographs, as this was not the "focus" of my question. [The inclusion was mine. --ebk]

The witness had described, in some detail, the movements of the "unknown," and that the whole event had a duration of approximately 12 minutes. I notice, also, that the object had been seen in the direction of Kennedy Airport, by the witness, BEFORE he had looked through his camera viewfinder.

Could a lens flare behave in such a fashion, AND move around for 12 minutes?

My question to the list was, in fact, asking if anyone had had any experience with "rapport"/"communication" etc. with "UNKNOWNNS."

My area of study is not so much photographic, as "communication."

Thank you.

JJ
