 > etc to help support what I claimed happened.

> thanks,
 > ALEX CAVALLARI

Alex,

First...you're original question regarding "communication" with
orbs or discs is a very real, and needed inquiry to this list,
and I hope others can expand on any communication, telepathy or
other, with entities from unknown sources.

I have not had one of these encounters, but I do have experience
with photo analysis. I am not prepared to state the photo
presented on this list of the "orb" is a lens flare, but I do
agree with Bruce Maccabee, preliminary analysis does include this
as a possibilty.

You stated there are more pictures of the orb. Comparative
analysis is one of the greatest assets to investigating unknowns,
that's why videos are so fascinating to work with...one can look
at several images of the same object. If you have more than one
photo of this orb, please post them...for the benefit of all.

There is room for the skeptical, just as there is room for the
intuitive believers.... it's all a matter of working together for
a common truth.

cheers,
Bryan Butcher
