JJ...

Do you still have the video tape of the event? I'm not sure I understand why you only have two still frames, one which you posted, if you took the video? Also...did you have a camera with you on the other nights when the objects reappeared? I guess I'm asking if there are more photos period :)

I believe when we begin gathering multiple photographic evidence of single events, then possibly our understanding of these objects will be broadened. A good case in point are the Arizona sightings last year. If the event would have been documented by one photo...even perhaps one video...the event which took place on March 13, 97 would not be considered a substantial sighting in modern ufology.

Photographic and video evidence will not solve the UFO mystery alone, it will take collaboration and patience on all fronts...

...but visuals always help :)

cheers,  
Bryan!
