Hi Errol, JJ, and list subscribers,

I would like to take offense at this UN-scientific and obviously biased opinion.

Jenifer Jarvis is a well-respected and honest skywatcher.

She has presented many pics of the "ORBS" and has been working with CSETI for several years.

My experience with photographing unidentified LITS reveal that sometimes even a close-up photo will sometimes be blacked out completely. Or will present light that looks totally different than that seen with naked eye.

Skeptical disinformation is not the same as scientific proof.

Steve
