>Subject: Mexico City UFO of 8/6/1997

It is my understanding from Brit Elders that there are at least 2 dozen witnesses from all walks of life.

Analysis of the video has continued (sub rosa) since my initial posts on various internet sites last fall. The analysis confirms the initial acceleration in no more than 1/30 sec and possibly in 1/60 sec.

The analysis also shows that the tilting that appears to be caused by rotation of the symmetry axis about vertical (like precession of a top) is at a 1 Hz rate and is continuous from the beginning to the end of the video of the object, and can be fitted from the beginning to the end with a single sine wave function.

Also it appears from analysis that the UFO made a nearly right angle turn and traveled away from the camera during the last seconds of its visibility (before going behind a tall building). The next issue of the MUFON J will contain an update.

I don't know if the March showing on sightings will even mention the analysis that has been carried out (no one has contacted me about it).
