From the time I was six years old until about age 45 I had conscious memories of strange, frightening, unexplainable experiences. It wasn't until recently that I learned about peoples discriptions and belief in abduction scenarios. I have never been hypnotized. About 15 years ago, the nightmares and strange, apparent visitations stopped and I, along with several family members, developed cronic fatigue syndrom. Is there a connection? I don't have a clue but it is interesting to ponder.

Best regards, Marie
