Maybe you can save a life

TUVPO is starting a research project about UFOlogy.

Any information forwarded to us will be added to our data bank and kept as an important source in determining the connection between ALP's and earthquakes. TUVPO would be very happy to work with organizations and institutions who could contribute to this project. TUVPO believes that even the smallest amount of information might be beneficial to save peoples' lives. At the moment, the research project consists of finding out if a relationship exists between ALP reports and seismic movements, and filing a report. For a report to be valid, it must contain seismic movement reports in the region where the ALP's have been seen. Seismic movements must be recorded no later than 30 days after observation.

The observation of ALP's must be documented by photos, eyewitness report or the media. Reports which do not carry the above features will not be taken into consideration. Any person or institution who would like to participate in this project may send their reports from their own region or from regions (all over the world) they are able to reach by Internet. The participants will be published in our web page. All you need to do is write your name, surname, e-mail address (Hotmail or any other similar free e-mail addresses will not be accepted) to kayyt@tuvpoorg.cjb.net
