>Pelicans no. But you did make a good point that there is some
>Arnold points that don't fit.

Kathleen,

Having experienced Florida and South Carolina pelicans in flocks, they tend to fly in straight lines, one behind the other. I don't know if Pacific pelicans behave that way or not but that struck me as odd too...pelicans over Washington??

>To James Easton, perception is a major key with the Arnold case.

>have read the coverage by Jenny Randles and also Larry
>Warren/Peter Robbins about Rendlesham Forest. I did not see a
>forest. I saw a stand of skinny tall trees that looked more
>sparse than most backyards in the Pacific Northwest. How can
>anyone be "scared" in this little group of trees? I was puzzled.

Don't know which part of the forest you were at but as the before and after photos point out in Warren&Robbins Left at East Gate, Rendlesham forest took a beating in a fluke storm in the Fall of '87. They mentioned that this could have been some result of fiddling with secret weather control machines. I wouldn't know about that but I can say that this hurricane-like storm came out of nowhere since I was in London at the time. We went to bed with no warning of a storm and woke up with uprooted trees all over town. Perhaps some Londoners can elaborate on the likelihood of such a storm occurring with no warning from the weathermen.

Bob
