Possibilities

From: Judith Dale <judithdale@earthlink.net>

Subject: Possibilities

Greetings All,

I've been reading all UFO UpDate posts as they hit my email. Except in a very few instances, I see the same old nitpicking go on and on. I came across these quotes recently:

"The more important fundamental laws and facts of physical science have all been discovered, and these are now so firmly established that the possibility of their ever being supplanted in consequence of new discoveries is exceedingly remote... Our future discoveries must be looked for in the sixth place of decimals."

- physicist Albert. A. Michelson, 1894

and:

"..so many centuries after the Creation it is unlikely that anyone could find hitherto unknown lands of any value."

- committee advising Ferdinand and Isabella regarding Columbus' proposal, 1486

Just thought I'd pass them along, perhaps as a reminder that; 1) we don't know everything, and 2) Let's not allow our eyes to be blinded by what we think we know exists, or is possible.

Whilst some nitpick, the barn still burns and the sightings continue.

My thanks to all who persist in their research to discover the truth, present their findings, and don't just spin their wheels debating for the sake of debate.

Blessings,

Judith Dale
