My_Sighting_Submission : It was a nice night out so me and my sister decided to go out for a drive. We were talking and listening to the radio when we heard a loud noise. It was kind of screechy and surprised us both. At first we thought it was the car so we pulled over and shut off the car. I went outside, but I could still hear it. I then looked North to where I felt the noise was coming from. I saw a rather large light in the air. My sister thought it was a plane because we were close to an airport. The light was bright and didn't blink at all like a plane does. When we saw it stop and move straight up we thought it must have been something else. We both believe in UFOs so we assumed it was one. The light suddenly changed to a light blue and zipped out of the sky in almost at about a 60 degree angle. We saw a few objects only seconds later that were obviously planes. We waited a while to see if it came back but it never did.

-I would like you to post my report so that others can compare it to theirs.
