Hello Karl, hi All,

Stan did spend time talking about the star map and Marjorie Fish's work. Both he and Jerry Clark made contributions which 'grounded' the proceedings in good old fashioned 3D reality. Budd and Dave Jacobs made equal contributions on that score.

Stan & Jerry were there to to bring their unique 'nuts & bolts' approach to the proceedings which they both did admirably and with much aplomb. And, contrary to popular belief, so did Budd and David Jacobs. There are so many false and unjustified accusations thrown at Budd and David that I just thought I'd mention the fact that they both happen to be two of the more 'grounded' people investigating this subject.

The lineup that was selected for the conference was deliberate and well thought out. It was one of the more "intelligent/thoughtful" conferences I have ever attended. No 'crystals and ballyhoo', just straight information that the attendees could use to formulate their own opinions.

Peace,

John Velez, Webmaster IF-AIC
