Monday 15th May 2000

I phoned the man at the number below. He said that the UFO sighting he wished to report happened to his 35-year-old son in the week after the cyclone in Broome, WA, earlier this year. The son was driving towards Paraburdoo, which is just north of the Tropic of Capricorn and south of Karratha and Port Hedland in the Hamersley Range area of WA. He was driving at night and saw a red light ahead of him. The light paced his car no matter what speed he drove at. After some time he stopped because he felt the light was playing games with him, and because he realised he had bent his steering wheel by gripping it so hard. The light also stopped about 500 metres ahead of him. The witness then decided he had enough, so planted his foot and accelerated towards the light. The red light then rose into the air, changed into a white light and produced a spotlight beam down towards the road. It then went up further into a storm cloud which it seemed to illuminate from the inside for a while, and then it disappeared.

When the witness reached the next petrol station stop he asked a lady there if anyone else had seen anything similar. At first she seemed reluctant to comment but later opened up and said that other people had had several similar sightings in that area.

The father commented that the son was not worried about the sighting, but they were both interested to know about any similar ones.

Best wishes
