>I see nothing ridiculous about a long lived species of aliens
>sending scientific probes out which may not return useful data
>about other planets for a century or more.

Hi, Larry!

I couldn't agree more. A lot of the limitations that science seems to put on the probability of ET life seems to be based on our own limitations in terms of intelligence and general life span. I've always considered most claims of ET contacts and/or sightings were most likely robotic probes. Makes plain sense and, as you suggest, solves a multitude of unanswered questions.

Roger
